MAX TEMPERATURE

Heats up to 600°F

COOKING SURFACE

330 sq in cooking area

WATTAGE

1750 watts 1.7 kW

SMART CONTROLS

Wi-Fi app monitoring and control

SAFETY & APPROVALS

NFPA approved safe for balconies

Who It Is For

-  Apartment dwellers needing balcony-safe griddle
-  Home cooks who want high-heat searing
-  Users who prefer electric over propane
-  People who want app-based temperature control
-  Hosts who cook multiple items at once

Who It Is Not For

-  Grillers seeking open-flame or charcoal flavor
-  Homes without a dedicated 15A circuit
-  Buyers wanting a lightweight portable unit
-  People who only cook indoors

Trade Offs to Consider

-  Requires dedicated 15A circuit to run
-  Single flat surface limits zoned cooking
-  Heavy frame reduces portability
-  Wi-Fi features depend on app and network

Users Say

● POSITIVES

- ✓ Fast heat-up to high temperatures
- ✓ Large surface handles many items
- ✓ App simplifies monitoring and control
- ✓ Grease system and seasoning ease cleanup

● COMPLAINTS

- ⚠ Heavy and difficult to move alone
- ⚠ Requires dedicated 15A outlet on its own circuit
- ⚠ Requires assembly out of the box

How It Compares

- Vs propane griddles: no open flame or fuel tanks
- Vs small electrics: higher top temp and larger area
- Vs tabletop units: heavier less portable more permanent

Choose This If...

- ✓ You need an apartment-safe outdoor griddle with high heat
- ✓ You can provide a 15A dedicated outlet and circuit
- ✓ You want Wi-Fi app temperature control
- ✓ You need a large flat surface for multi-item cooking

✗ Skip This If...

- ✗ You prefer gas flavor or open-flame grilling
- ✗ You lack a compatible 15A circuit or outlet
- ✗ You need a lightweight highly portable griddle
- ✗ You do not want app-based controls
