Who It Is For

- Homeowners who clean fireplaces and wood stoves
- Pellet stove owners performing regular maintenance
- Grill owners removing charcoal or pellet ash
- Users who want reusable washable filters

Who It Is Not For

- Anyone needing wet liquid pickup
- People who require HEPA allergy filtration
- Buyers seeking cordless operation
- Commercial users with large scale needs

Trade Offs to Consider

- Metal canister improves durability adds weight
- Strong 4 HP suction but single speed
- 4 gallon capacity limits very large jobs
- Heat rating capped at 104°F

💬 Users Say

● **POSITIVES**

✓ Strong suction for removing stubborn ash

✓ Washable filters reduce replacement cost

✓ Compact 4 gallon holds moderate amounts

● **COMPLAINTS**

⚠ Corded only limits portability

⚠ Weight from metal canister may feel heavy

⚠ Not rated for ash above 104°F

⇄ How It Compares

● Shop vacs: less ash-specific filtration

● Cordless vacuums: corded gives continuous power

● Commercial ash units: lower capacity and power

✓ Choose This If...

✓ You clean fireplaces stoves or grills regularly

✓ You prefer washable reusable filters to replacements

✓ You want a metal canister for durability

✓ You need a compact 4 gallon ash vac

✕ Skip This If...

✕ You need to vacuum wet spills or liquids

✕ You require cordless battery operation

✕ You need industrial scale continuous ash removal

✕ You need certified HEPA filtration for allergies
