

FATCANMA PBG55 Chimney Insulation Wool Gasket

QUICK BUYER GUIDE

Buy if you need replacement chimney insulation for pellet grills

At a Glance Specs

COMPATIBILITY

Fits Traeger Pit Boss Camp Chef

MATERIAL

Wool with glass-fiber surface

COVERAGE

Up to 450 square inches

INSTALLATION

Align spacer bore and screw

DIMENSIONS

0.1 x 0.1 x 0.1 inches

WEIGHT

0.634 ounces item weight

Who It Is For

- ✓ Owners of Traeger Pit Boss or Camp Chef grills
- ✓ People replacing worn chimney insulation or gasket
- ✓ DIYers comfortable with basic screw-in repairs

Who It Is Not For

- ✗ Users requiring OEM manufacturer parts
- ✗ Those needing non-wool high-temperature insulation
- ✗ People unsure about model fit or size

Trade Offs to Consider

- Wool with coarse glass fibers may irritate skin
- Aftermarket replacement not sold as OEM part
- Coverage and small size may not fit larger chimneys

How It Compares

- Versus OEM units this is an aftermarket wool replacement
- Versus ceramic or silicone options this is softer wool insulation
- Versus full chimney rebuilds this is a quick non-structural fix

Choose This If...

- ✓ You own one of the compatible pellet grill models
- ✓ You want to quickly restore oven temperature control
- ✓ You can install a small gasket with basic tools

Skip This If...

- ✗ You need OEM-branded factory replacement parts
- ✗ You prefer non-wool or ceramic insulation materials
- ✗ Your chimney is larger than the listed coverage
