## Who It Is For

---

- ✓ Home cooks who want fast 13-inch pizzas
- ✓ Backyard hosts needing consecutive hot pizzas
- ✓ Users who want electric outdoor cooking
- ✓ Buyers with counter space and 33 lb lift

## Who It Is Not For

---

- ✗ Anyone needing pizzas larger than 13 inches
- ✗ Those without access to electrical power
- ✗ Campers who need ultralight carry gear
- ✗ Shoppers seeking wood or gas ovens

## Trade Offs to Consider

---

- Fast cook times but limited capacity
- Electric power supplies steady heat needs outlet
- Water-resistant design not described as waterproof
- High peak temperatures require heat-safe tools

## Users Say

---

### ● POSITIVES

- ✓ Rapid heat up to 850°F
- ✓ Cooks a 13-inch pizza in about 3 minutes
- ✓ LED display with simple dial controls

### ● COMPLAINTS

- ⚠ Limited to 13-inch pizzas
- ⚠ Weighs about 33 pounds
- ⚠ Requires electrical power outdoors

## How It Compares

---

- Vs toaster ovens: reaches higher temperatures faster
- Vs wood/stone ovens: less wood-fired flavor
- Vs built-in outdoor ovens: more portable less permanent

## Choose This If...

---

- ✓ You want very fast 13-inch pizzas outdoors
- ✓ You have a nearby electrical outlet and counter
- ✓ You host small groups and need consecutive pizzas

## Skip This If...

---

- × You regularly make pizzas larger than 13 inches
- × You need a lightweight ultralight camping oven
- × You require wood or gas-fired cooking
