## Who It Is For

---

- ✓ Backyard cooks who smoke large cuts
- ✓ Users who prefer charcoal and wood smoke
- ✓ People wanting selectable reverse-flow or offset modes
- ✓ Those who can handle heavy outdoor equipment

## Who It Is Not For

---

- ✗ Casual grillers who want quick setup
- ✗ Apartment or condo dwellers without outdoor space
- ✗ Shoppers needing a portable compact smoker

## Trade Offs to Consider

---

- Large footprint needs dedicated outdoor space
- Charcoal operation requires regular fuel management
- 226 lb weight makes relocation difficult
- No gas or electric heating option available

## Users Say

---

### ● POSITIVES

- ✓ Spacious cooking area fits big cuts
- ✓ Reverse-flow option improves heat consistency
- ✓ Sturdy heavy-gauge steel build

### ● COMPLAINTS

- ⚠ Requires frequent charcoal tending
- ⚠ Bulky heavy assembly and placement
- ⚠ Limited to outdoor charcoal use

## How It Compares

---

- Vs propane smokers: charcoal-only heat source
- Vs pellet grills: no automated fuel feed
- Vs smaller offsets: larger capacity but less portable

## Choose This If...

---

- ✓ You smoke large cuts regularly
- ✓ You prefer charcoal flavor and manual control
- ✓ You want option to run reverse-flow or traditional

## Skip This If...

---

- × You need a lightweight portable grill
- × You only grill small meals occasionally
- × You lack outdoor space for a large smoker
