## Who It Is For

---

- ✓ Owners of Kamado Joe Junior grills
- ✓ Replacing frayed or burned gaskets
- ✓ Do-it-yourself grill maintenance users
- ✓ People wanting tighter heat control

## Who It Is Not For

---

- ✗ Owners of different grill models
- ✗ People who avoid adhesive fixes
- ✗ Those who cannot prep install surface

## Trade Offs to Consider

---

- Peel-and-stick is fast but semi-permanent
- May require trimming for other models
- Third-party replacement not OEM branded
- Needs clean dry surface and 12h cure

## Users Say

---

### ● POSITIVES

- ✓ Easy peel-and-stick installation
- ✓ Reduces smoke leakage and heat loss

---

### ● COMPLAINTS

- ⚠ May need trimming for nonstandard grills

## How It Compares

---

- Versus frayed gasket: provides tighter seal
- Versus loose felt: includes adhesive backing
- Versus generic sizes: sized for Junior use

## Choose This If...

---

- ✓ You need one gasket for base and lid
- ✓ You prefer peel-and-stick installation
- ✓ You want to reduce charcoal and smoke loss
- ✓ You want a high-temp fiber replacement

## Skip This If...

---

- ✗ You have a different grill model
- ✗ You avoid adhesive-backed products
- ✗ You cannot clean and dry surface before install
- ✗ You need an OEM branded part
