**CLEANING**

**Submersible with control removed**

## Who It Is For

---

- ✓ Preparing large breakfasts or family meals
- ✓ Meal prepping or batch cooking routines
- ✓ Cooking greasy meats where drainage helps
- ✓ Wanting a nonstick surface that cleans easier

## Who It Is Not For

---

- ✗ Needing a compact or travel-friendly griddle
- ✗ Without access to a 120V household outlet
- ✗ Prefer stovetop or induction cooking methods
- ✗ Requiring fully dishwasher-safe removable parts

## Trade Offs to Consider

---

- Large cooking area but bulky to store
- 1500W heats well but uses substantial power
- Submersible after removing control for cleaning
- Ceramic nonstick helps release but can wear

## Users Say

---

### ● POSITIVES

- ✓ Big surface for multiple servings
- ✓ Automatic control keeps steady temperature
- ✓ Ceramic nonstick eases cooking and cleaning

### ● COMPLAINTS

- ⚠ Large footprint occupies counter space
- ⚠ Control must be removed to submerge
- ⚠ Nonstick surface can wear with use

## How It Compares

---

- Smaller electric griddles offer easier storage
- Stovetop griddle requires compatible range and cookware
- Outdoor grills deliver higher sear and open-air use

## Choose This If...

---

- ✓ You need to cook large batches at once
- ✓ You want automatic temperature maintenance
- ✓ You value a submersible nonstick griddle

## Skip This If...

---

- × You lack counter space or storage
- × You require dishwasher-safe removable parts
- × You need a compact travel appliance
