Lid stack and side damper

CONSTRUCTION MATERIAL
Alloy steel construction

WEIGHT AND SIZE
73.2 lb assembled weight

WORKSPACE AND STORAGE
Collapsible side tables and shelf

Who It Is For

- ✓ People who cook for large groups regularly
- ✓ Buyers who prefer charcoal barbecue flavor
- ✓ Users wanting adjustable charcoal height control
- ✓ Home cooks needing built-in prep and storage

Who It Is Not For

- ✗ Those wanting a lightweight portable camping grill
- ✗ Buyers who need gas or electric fuel options
- ✗ People requiring automated digital temperature control
- ✗ Residents with very limited outdoor space

Trade Offs to Consider

- Large cooking area sacrifices portability
- Charcoal fuel adds flavor but needs tending
- Adjustable pan improves control but is manual
- Extra tables increase assembly and storage steps

How It Compares

- Smaller charcoal grills offer more portability but less surface
- Gas grills heat faster and need less tending
- Kettle grills are simpler to transport and store
- Dedicated smokers provide longer low-and-slow capacity

Choose This If...

- ✓ You routinely grill for many people outdoors
- ✓ You prioritize charcoal flavor and manual control
- ✓ You need built-in prep space and storage
- ✓ You can accommodate a heavier stationary grill

Skip This If...

- ✗ You need a lightweight portable camping grill
- ✗ You prefer gas or electric fuel options
- ✗ You require precise automated temperature controls
- ✗ You have very limited patio or balcony space
