## Who It Is For

---

- ✓ Home cooks needing an infrared sear
- ✓ Hosts cooking for medium to large groups
- ✓ People who prefer propane gas convenience
- ✓ Grillers who want a wood-smoke option

## Who It Is Not For

---

- ✗ Indoor or balcony-only users
- ✗ Those seeking a lightweight portable grill
- ✗ Buyers who require electric or charcoal fuel
- ✗ Shoppers unwilling to maintain cast iron grates

## Trade Offs to Consider

---

- Infrared sear limited to 92 sq in
- Porcelain-enamel cast iron needs upkeep
- Requires dedicated outdoor space footprint
- Propane use requires periodic tank refills

## How It Compares

---

- More sear heat than standard gas grills
- Larger cooking area than compact models
- Adds wood-smoke via included smoker box
- Requires outdoor space unlike indoor electric grills

## Choose This If...

---

- ✓ You want an infrared sear station
- ✓ You need about 600 square inches cooking
- ✓ You prefer propane and quick ignition
- ✓ You want cast iron grates for searing

## Skip This If...

---

- ✗ You lack outdoor space or open air
- ✗ You need a lightweight portable grill
- ✗ You will not maintain cast iron grates
- ✗ You require electric or charcoal-only operation
