

Typhur WT04 Sync Gold Wireless Meat Thermometer

QUICK BUYER GUIDE

For cooks needing long-range wireless multi-probe monitoring

At a Glance Specs

PROBES INCLUDED
Four meat probes included

SENSORS PER PROBE
Six sensors per probe

ACCURACY
Half-degree Fahrenheit accuracy

CONNECTIVITY
Wi-Fi Bluetooth and Sub-1 GHz

SIGNAL PERFORMANCE
Strong signal through thick walls

HEAT RATING
Up to 932°F probe rating

Who It Is For

- ✓ Smokers and kamado grill cooks
- ✓ Multi-ingredient cooks using multiple probes
- ✓ Oven and air-fryer home cooks
- ✓ Cooks who want base control

Who It Is Not For

- ✗ Occasional single-item cooks
- ✗ People wanting cheap single-probe thermometers
- ✗ Those avoiding battery powered tools
- ✗ Buyers preferring analog thermometers

Trade Offs to Consider

- Only four meat probes included
- Requires five C batteries for base
- Both base and app provide controls
- Range depends on cooking environment

Users Say

● POSITIVES

- ✓ Reliable long-range connection
- ✓ Accurate fast temperature reads
- ✓ Standalone base reduces phone dependency

● COMPLAINTS

- ⚠ Requires bulky C batteries
- ⚠ Four probes may be limiting
- ⚠ App required for remote features

How It Compares

- Stronger range than Bluetooth thermometers
- Includes four probes vs single-probe units
- Wireless monitoring without wired probes

Choose This If...

- ✓ You need long indoor/outdoor monitoring
- ✓ You manage several cuts at once
- ✓ You require sub-degree accuracy
- ✓ You want base plus app control

Skip This If...

- × You only cook single items occasionally
- × You want a USB rechargeable unit
- × You need a simple analog thermometer
- × You dislike digital app controls
