## Who It Is For

---

- ✓ Home cooks who smoke and sear
- ✓ Hosts who feed large outdoor groups
- ✓ Grillers preferring charcoal flavor and control
- ✓ Users planning to use BBQ system inserts

## Who It Is Not For

---

- ✗ People banned from charcoal grilling
- ✗ Buyers needing a lightweight portable grill
- ✗ Those who require gas or electric grills

## Trade Offs to Consider

---

- Heavy steel build reduces portability
- Charcoal requires more setup and cleanup
- No built-in gas limits fuel options

## Users Say

---

### ● POSITIVES

- ✓ Strong heat retention and stability
- ✓ Large cooking area suits feeding crowds

---

### ● COMPLAINTS

- ⚠ Heavy weight makes relocation difficult
- ⚠ Charcoal cooking requires more time and supplies

## How It Compares

---

- Uses dual-walled steel vs ceramic shell
- Vs kettle grills larger 24-inch cooking area
- Vs gas grills charcoal only no gas hookup

## Choose This If...

---

- ✓ You need a large charcoal cooking surface
- ✓ You want adjustable grate for smoking and searing
- ✓ You value insulated long-duration heat retention

## Skip This If...

---

- ✗ You cannot use charcoal where you live
- ✗ You need a lightweight truly portable grill
- ✗ You require immediate gas or electric cooking
